About NIOH

The NIOH is a premier institute, under the aegis of the ICMR, Department of Health Research, Ministry of Health and Family Welfare, Govt. of India.

The Institute was established by the Indian Council of Medical Research, New Delhi as "Occupational Health Research Institute" (OHRI) at the B. J. Medical College, Ahmedabad, in the year 1966. The OHRI was rechristened as "National Institute of Occupational Health" (NIOH) in 1970 and moved to the present premises. To cater local needs of the Southern and Eastern regions, the Institute established two Regional Occupational Health Centres (ROHC) at Bangalore (1977) and Calcutta (1980).

Occupational Health is a sustained activity aimed at promotion and maintenance of highest degree of physical, mental and social well being of workers in all occupations.

About ENVIS -NIOH

Environmental Information System [ENVIS] Centre, housed at National Institute of Occupational Health [NIOH], is sponsored by Department of Environment, Ministry of Environment, Forests and Climate Change, Government of India, New Delhi. This centre is working since 1984. The centre is engaged in collection, collation, storage, retrieval and dissemination of Indian information related to occupational and environmental health. The aim is to create awareness about occupational health and safety through awareness programmes and improve working conditions through recommendations to decision makers. The centre is involved in publication of newsletters on current issues related to occupational and environmental health, bibliographies on the important occupational diseases as a consolidated source of reference for researchers, monthly NIOH news bulletin to keep the citizens of the country updated on various aspects of occupational and environmental health.

About Seminar

In the current era of urbanization and industrialization the workforce of the country is increasing in diversified occupations. These occupations, while one hand provide livelihood to the worker deteriorating work environment might also be responsible for deterioration of the productivity/quality. Under these environmental stresses where the worker is supposed to work also plays a major role in the productivity of the worker as well as also

making them more prone towards the occupational hazards. Thus there ought to be awareness and motivation in the workers to work safely at their workplaces. The objectives of this seminar is:

- to provide a platform for discussion, sharing and exchange of ideas and insights on issues related to environmental and occupational health
- to achieving common agreement on the most practical and realistic mechanism in strengthening the health and safety of human beings
- to encourage networking by bringing together parties involved in environmental and occupational health from various national agencies and institutions
- to emphasize and promote recent and modern practices in the field of environmental and occupational health
